

Bubble Solution & Bubble Windows

MATERIALS NEEDED

- Large shallow bowl
- 1/2 cup of dish soap
- 1 1/2 cup of water
- 2 teaspoons of sugar
- 1 straw
- 10-12 inch piece of yarn
- Scissors

ESTIMATED TIME: 5-10 min

STEPS

1. In a large shallow bowl, add water, dishsoap and sugar. Stir gently (stirring quickly will mix up the bubbles in the bowl too early.)
2. Cut the straw in half.
3. Thread the yarn through the 2 straw pieces (as if making a necklace) and tie a knot. Hide the knot inside one of the straws.
4. Hold the a straw in each hand to make a rectangular shape. This is your Bubble Window.
5. Dip the Bubble Window in the shallow bowl with the bubble solution and pull out slowly, until you see a transparent sheen.
6. Put Bubble Window up to face and blow slowly. Large bubbles should appear.
7. Get ready for some good clean fun!
